## PROFESSIONAL SUMMARY

---

Full-Stack Engineer with 7+ years of professional software development experience building, deploying, and maintaining web applications across frontend and backend environments. Strong expertise in TypeScript, JavaScript, React.js, Next.js, Node.js, Express.js, MongoDB, and RESTful API development. Experienced in designing database structures, implementing authentication and authorization, developing responsive user interfaces, optimizing application performance, and translating business requirements into maintainable technical solutions. Comfortable working across the full software development lifecycle, from requirements analysis and implementation to testing, deployment, and production support.

## TECHNICAL SKILLS

---

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3

**Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, Responsive Design, Mobile-First Development, Accessible UI Development

**Backend:** Node.js, Express.js, RESTful API Development, Authentication, Authorization

**Database:** MongoDB, Mongoose, Database Design, Query Optimization

**Testing & Quality:** Jest, Postman, API Testing, Debugging, Error Handling, Code Refactoring

**Development & Deployment:** Git, GitHub, Cloud Deployment, Application Maintenance

## PROFESSIONAL EXPERIENCE

---

### NEXT IMPERIAL LIMITED — Lagos, Nigeria

**Full-Stack Engineer** | 2022 – Present

- Design, develop, deploy, and maintain end-to-end web applications using React.js, Node.js, Express.js, and MongoDB.
- Design and implement RESTful APIs to provide secure and efficient communication between frontend and backend services.
- Build responsive and user-friendly frontend interfaces using React.js and Tailwind CSS.

- Design and manage MongoDB data structures using Mongoose to support application functionality and maintainability.
- Implement authentication and authorization mechanisms to protect application resources and control user access.
- Optimize backend logic and database queries to improve application performance, scalability, and reliability.
- Work closely with stakeholders to understand functional requirements and translate business needs into practical technical solutions.
- Apply structured Git and GitHub workflows to manage source code and support maintainable development practices.
- Perform testing, debugging, refactoring, and ongoing application maintenance throughout the software development lifecycle.

## SELECTED ENGINEERING CAPABILITIES

---

**Full-Stack Application Development:** Experienced in developing applications across the frontend, backend, database, and deployment layers.

**RESTful API Development:** Experienced in designing and implementing APIs that connect frontend applications with backend services and databases.

**Authentication & Authorization:** Experienced in implementing application security through authentication, authorization, and role-based access control.

**Database Engineering:** Experienced in MongoDB and Mongoose, including data modeling, database design, and query optimization.

**Frontend Engineering:** Experienced in building responsive, accessible, and mobile-first interfaces with React.js, Next.js, Tailwind CSS, and Redux Toolkit.

**Application Performance:** Experienced in debugging, refactoring, and optimizing backend logic and database queries to improve application reliability and performance.

## EDUCATION

---

### AUCHI POLYTECHNIC — Edo State, Nigeria

Higher National Diploma (HND), Computer Science — Upper Credit | 2011

National Diploma (ND), Computer Science — Upper Credit | 2008

## ADDITIONAL INFORMATION

---

- Strong understanding of the full application lifecycle, from requirements and design through development, testing, deployment, and maintenance.
- Strong problem-solving and analytical abilities.
- Comfortable working independently and collaboratively within engineering teams.
- Continuous learner with a focus on modern full-stack development technologies.
